

MONERO ARCHIVAL PROJECT

THIS IS THE KEY INFORMATION THAT WE WILL WANT TO BE ABLE TO QUERY QUICKLY & EASILY

| This data is simply copied from fields in the block | | | | | | | We usually receive multiple copies of the same block from multiple nodes, should we record each copy in its own row, or just record multiple timestamps here (since all the other fields will be identical)? | This can only be determined retrospectively, e.g. > 3 hours later |
|---|------------|--------------------------------------|--|--|---|---|--|---|
